National Register of Historic Places  
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, How to Complete the National Register of Historic Places Registration Form. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).

1. Name of Property
   historic name Case Study House #1
   other names/site number

2. Location
   street & number 10152 Toluca Lake Avenue
   city or town Los Angeles
   state California code CA county Los Angeles code 037 zip code 91602

3. State/Federal Agency Certification

   As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

   In my opinion, the property meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

   ___ national ___ statewide ___ local

   Signature of certifying official/Title Date

   State or Federal agency/bureau or Tribal Government

   In my opinion, the property meets does not meet the National Register criteria.

   Signature of commenting official Date

   Title State or Federal agency/bureau or Tribal Government

4. National Park Service Certification

   I hereby certify that this property is:

   ___ entered in the National Register ___ determined eligible for the National Register
   ___ determined not eligible for the National Register ___ removed from the National Register
   ___ other (explain:) _______________________________

   Signature of the Keeper Date of Action

Narrative Description

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a summary paragraph that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

Summary Paragraph

Case Study House (CSH) #1 is located on a sloping site in the Toluca Lake District of Los Angeles. Two thousand square feet in size, the dwelling contains architectural elements that would feature prominently in future Case Study houses including floor-to-ceiling glass, a flat roof, open floor plan, easy access to the outdoors, and standardized materials such as concrete block, plywood panels and industrial glass. The property exhibits a high level of integrity.

Narrative Description

This one-story house was constructed on a gently sloping lot elevated several feet above street level in the prestigious Toluca Lake tract. Other homes by significant mid-century architects are in the immediate neighborhood. Case Study House #1 introduced architectural elements that came to characterize the program such as floor to ceiling glass, flat roof, open floor plan, a minimum of hallways, flexible multi-purpose rooms, immediate access to gardens from all major rooms, and use of standardized materials such as concrete block, plywood panels and industrial glass.

Planar walls shield the house from the street while orienting the public living rooms to rear gardens for privacy. The plan, materials, and siting of the house encourage a relaxed lifestyle based on indoor-outdoor living. The dwelling is of wood frame post and beam construction on a concrete slab foundation. It is approximately 2000 square feet in size with a large combination living and dining room overlooking the rear gardens and pool through floor to ceiling windows. There are three bedrooms, two bathrooms and a kitchen.

The primary front entrance is approached via a pathway through a grassy yard and a covered canopy. It opens to a formal entry hall leading to the bedrooms and to the common living areas. A wood fence behind high foliage hides the door leading to the kitchen and pantry off a private patio and garage side door. The two-car garage is to the left of the kitchen patio.

The dwelling has a large living room open to the dining area that faces the pool and back garden through floor to ceiling sliding glass doors. A large fireplace decorated with rock veneer and a decorative sliding screen anchors the end of the open area. The opposite side of the open common area has blond plywood built-in cabinets and a decorative lattice separating it from the kitchen and entry hall.

At one end of the house are two bedrooms. The smaller one is called the nursery and faces the street; the large bedroom faces the backyard. A bathroom with a common sink and bathtub separates them. At the other end of the house past the common areas, is another bedroom with built-ins and a full bath decorated with tile. The two bedrooms have built-in cabinets and closets that resemble those found in ship staterooms, since architect Davidson had designed ship interiors.
The windows throughout the house are either floor to ceiling sliding glass or metal frame casements. The bathrooms have casement clerestory windows. Door and cabinet hardware is original throughout the house. Cabinets in the common areas are original blond plywood. Interior walls are plasterboard.

The house is essentially original and unmodified with the sole exception being the addition of a small music studio behind the garage that is not visible from the street. As a result, the house exhibits a high level of integrity of design, workmanship, and materials. The residence is in its original location and its setting has been retained. Integrity of association is high because of its continued use as a single-family residence. Because of these factors, integrity of feeling remains strong.

Criteria Considerations (explanation, if necessary)

N/A
Statement of Significance Summary Paragraph (Provide a summary paragraph that includes level of significance and applicable criteria.)

Case Study House #1 meets the criteria established in the Registration Requirements outlined in the MPS cover document. The house retains a high level of physical integrity. As relates to eligibility, the property meets Criterion A for its association with experimental modern housing in the postwar years under the auspices of John Entenza’s *Arts & Architecture* magazine. The property is also significant under Criterion C because it embodies the distinctive characteristics of residential architecture associated with the Case Study House program. In addition, CSH #1 was designed by master architect Julius Ralph Davidson. Therefore, the property qualifies for listing under Criteria A and C at the local level of significance.

Narrative Statement of Significance (Provide at least one paragraph for each area of significance.)

Case Study House #1 (CSH #1) was designed by Julius Ralph Davidson and erected over a three-year period starting in 1945. It was completed in 1948 and is the first dwelling constructed under the auspices of *Arts and Architecture* magazine’s Case Study House Program that ran from 1945-1966. The importance of the house generally, its significance within the program, and the work of its architect are thoroughly discussed within the historic Case Study context, being: "Experimental Modern residential architecture of the Case Study House program in Southern California: 1945-1966." The house is a key example of the property type: Single-family residences of the Case Study program," and the "wood-frame post and beam dwellings" subtype. The property meets National Register Criterion A for its association with experimental modern housing in the postwar years under the auspices of John Entenza’s *Arts & Architecture* magazine.

CSH #1 greatly influenced the evolution of the program by introducing plywood walls, a concrete slab foundation, flat roof, sliding glass walls open to the outside for easy indoor/outdoor access, and an open floor plan. In addition, the property represents the work of master architect Julius Ralph Davidson, one of the European émigrés who jump-started California’s modern architecture movement. As a result, the property meets National Register Criterion C because it embodies the distinctive characteristics of residential architecture associated with the Case Study House program and is the work of a master architect.

Developmental history/additional historic context information (if appropriate)

10. Geographical Data

Acreage of Property  Less than one acre
(Do not include previously listed resource acreage.)

Latitude/Longitude Coordinates
(Follow similar guidelines for entering the lat/long coordinates as describe on page 55, How to Complete the National Register Registration Form for entering UTM references. For properties less than 10 acres, enter the lat/long coordinates for a point corresponding to the center of the property. For properties of 10 or more acres, enter three or more points that correspond to the vertices of a polygon drawn on the map. The polygon should approximately encompass the area to be registered. Add additional points below, if necessary.)

Datum if other than WGS84: __________
(enter coordinates to 6 decimal places)

1. Latitude: N 34.1485          Longitude: W 118.35166

Google Map

Verbal Boundary Description (Describe the boundaries of the property.)

Boundary Justification (Explain why the boundaries were selected.)

### Additional Documentation

Submit the following items with the completed form:

- **Maps:** A USGS map (7.5 or 15 minute series) indicating the property's location.

  A Sketch map for historic districts and properties having large acreage or numerous resources. Key all photographs to this map.

- **Continuation Sheets**

- **Additional items:** (Check with the SHPO or FPO for any additional items.)

### Photographs:

Submit clear and descriptive photographs. The size of each image must be 1600x1200 pixels at 300 ppi (pixels per inch) or larger. Key all photographs to the sketch map.
